

VRUNDAVAN
CONSTRUCTION

We build India’s tomorrow.

Company profile · Infrastructure · Civil · Telecom · Since 2001

ABOUT US

We build India’s tomorrow.

Since 2001, Vrundavan Construction has been at the forefront of India’s infrastructure revolution. We specialize in heavy engineering, railway systems and large-scale industrial projects that define the nation’s progress. Our approach combines traditional craftsmanship with modern structural science.

Our portfolio spans critical national assets, including railway sidings, highway networks, water infrastructure and iconic monuments — from the foundation of the Statue of Unity to the canal network of the Sardar Sarovar Project. Every project we undertake is a testament to our commitment to structural integrity and engineering precision.

We leverage advanced construction technologies and a rigorous zero-accident safety culture. Our teams are equipped with state-of-the-art machinery and digital project management tools, ensuring that safety and innovation go hand in hand at every site we manage.

Our vision is to be the primary architect of India’s modernization journey, recognized as the most trusted partner for high-complexity infrastructure projects — merging architectural beauty with industrial strength.

412+ completed projects · **24+** years · Government and private clients across India

SERVICES

Eight disciplines. One standard of precision.

PIPELINE LAYING

Expertise in heavy-duty fluid transportation systems.

Vrundavan Construction provides end-to-end pipeline laying solutions for cross-country and urban fluid transportation. Our expertise covers critical water distribution networks, gas pipelines, and industrial slurry lines, ensuring leak-proof integrity across hundreds of kilometers.

Over 500+ km of pipeline successfully commissioned · Expertise in mild steel (ms) and di pipe installations · Advanced horizontal directional drilling (hdd) capabilities

ROAD CONSTRUCTION

High-durability paving and highway engineering.

We build the arteries of India's logistics network. From national highways to heavy-duty industrial corridor paving, our road construction division focuses on surface durability, load-bearing capacity, and all-weather resilience.

Rigid concrete and flexible asphalt pavements · National highway and state corridor expertise · Intelligent compaction and sensor-paving tech

CIVIL WORK

Reinforced structures and foundational concrete solutions.

Civil engineering is the bedrock of Vrundavan Construction. We execute massive structural projects ranging from industrial warehouses and commercial complexes to highly specialized heavy-machine foundations and retaining structures.

Heavy machine foundations and industrial sheds · Advanced aluminum and steel formwork · High-grade concrete batching and pouring

TOWER CONSTRUCTION

Erecting telecommunication and power transmission grids.

Vrundavan Construction stands at the forefront of telecommunications infrastructure, specializing in the high-precision verticality required for modern tower systems. Our engineering approach integrates structural resilience with rapid deployment protocols.

173+ towers successfully constructed · Official reliance jio infrastructure partner · Extensive list of certified sites across gujarat

SERVICES

Eight disciplines. One standard of precision.

OFC LAYING

Precision optic fiber network deployments.

We build the backbone of the digital age. Our Optical Fiber Cable (OFC) laying division executes high-speed network connectivity projects across urban grids and rural landscapes, connecting the unconnected.

Over 12,000 km of ofc laid nationwide · Zero-loss fusion splicing and otdr testing · Rapid deployment micro-trenching technologies

EARTHWORK & EXCAVATION

Large scale land grading and site preparation.

Before any structure rises, the earth must be tamed. Our heavy earthwork and excavation division provides the crucial first step for massive infrastructure, industrial, and mining projects.

Mass excavation and precision site grading · Fleet of high-capacity heavy machinery · Hard rock blasting and topographical leveling

LINING & GROUTING

Surface protection and structural reinforcement services.

Water management and structural sealing require uncompromising precision. Our lining and grouting services ensure the absolute impermeability and reinforcement of canals, tunnels, and deep foundations.

Mechanized canal and reservoir lining · High-pressure epoxy and cementitious grouting · Prevention of water seepage and ingress

RAILWAY INFRASTRUCTURE

Comprehensive railway track laying and station work.

Driving the momentum of the nation's transit. We execute highly technical railway infrastructure projects, from broad-gauge track laying to the construction of modern transit stations and railway overbridges (ROBs).

Broad-gauge track laying and linking · Construction of railway overbridges (rob) · High-speed freight corridor earthworks

SELECTED PROJECTS

Delivered before the deadline.

STATUE OF UNITY FOUNDATION

Sardar Vallabhbhai Patel Rashtriya Ekta Trust · Infrastructure · Kevadia, Gujarat, India

The foundation of the tallest metal statue needs a solid and uncommonly strong base. Vrundavan Construction has built the base with great integrity and we take a bit of pride in completing the project before time.…

BARI-SANGAMNER HIGHWAY

State Public Works Department · Highway · Maharashtra, India

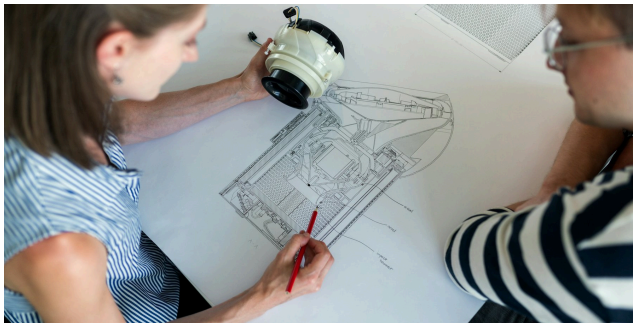

The Bari-Sangamner road project is a critical infrastructure initiative aimed at improving connectivity and reducing travel time across the hilly terrains of Maharashtra. Vrundavan Construction was responsible for laying a multi-lane highway capable of handling heavy commercial traffic.…

PARVATI PIPELINE

Indira Sagar Project Authority · Pipeline · Madhya Pradesh, India

The ISP Parvati Pipeline Project stands as a monumental achievement in water infrastructure. Designed to transport raw water across challenging geographical obstacles, this pipeline serves as a lifeline for major agricultural and industrial zones.…

JIO OFC ROUTES

Reliance Jio Infocomm · Ofc Network · Pan-India

Driving India's digital revolution, Vrundavan Construction partnered with Reliance Jio to lay thousands of kilometers of Optical Fiber Cable (OFC) for their National Long Distance (NLD) routes. This network forms the backbone of modern high-speed internet connectivity across the nation.…

SELECTED PROJECTS

Delivered before the deadline.

JIO TOWER NETWORK

Reliance Jio Infocomm · Telecom · Western India

To support the rapid expansion of 4G and 5G networks, Vrundavan Construction undertook the massive Jio Growth 4 & 5 Tower Project. We were tasked with the end-to-end civil construction and steel erection of hundreds of telecommunication towers.…

SARDAR SAROVAR DAM & CANAL

Sardar Sarovar Narmada Nigam Ltd. · Water Resource · Narmada District, Gujarat

The Sardar Sarovar Project is one of the largest water resources projects in India. Vrundavan Construction played a pivotal role in the expansive canal lining and earthwork infrastructure, enabling the distribution of water to drought-prone regions.…

PIPAVAV PORT RAILWAY SIDING

Gujarat Pipavav Port Limited · Railway · Amreli, Gujarat

To accelerate freight movement at one of India's busiest ports, Vrundavan Construction was commissioned for the Pipavav Railway Siding Project. This required the rapid construction of heavy-duty rail infrastructure to support massive cargo trains.…
